Directions

1. Draw diagonal lines on a piece of copy paper. Use colors of the season, and vary the thickness of the lines. Use markers or crayons. Children who need help with making the lines diagonally might like a copy of page 4 of this PDF.
2. Roll the paper up, upside down, on a pencil or marker.
3. Use a single piece of tape to keep the paper from unrolling.
4. Roll one end up and let go so it looks like a candy cane.
5. Make another one or two candy canes.
6. Tie with a ribbon and perhaps a real candy cane. Now you have a candy cane bouquet.
